1.) Cyclic Rotation:

```
FUNCTION solution(A,K)
    IF length of A is 0 THEN
        Return A
    END IF
    FOR i FROM 1 to K
    last = last element of A
    FOR j FROM last index of A DOWN to 1
      A[j] = A[j-1]
    END FOR
    A[0] = last
  END FOR
```

2.) Odd Occurences In Array

```
FUNCTION solution(A)
  IF length of A is 0 THEN
     Return A
   END IF

  CREATE an empty dictionary called counts

  FOR each number in A

  IF number is already in counts THEN
     increase its count by 1
  ELSE
     Set its count to 1

  END IF
END FOR
FOR each number in counts
     IF the count of number is odd THEN
       Return number
     END IF
END For
END function
```

3.) FrogJmp

```
FUNCTION solution(X, Y, D)
    distance = Y - X
    IF distance = 0 THEN
        RETURN 0
    END IF
    jumps = distance DIV D
    IF distance MOD D is not 0 THEN
        jumps = jumps + 1
    END IF
    Return jumps

END FUNCTION
```

4.) Missing Integer

```
FUNCTION solution(A)
  IF A is empty
    RETURN A
  END IF

  CREATE an empty dictionary called numbers

  FOR each number in A
    IF number is greater than 0
      ADD number to numbers
    END IF
  END FOR

  SET missing = 1

  WHILE missing is in numbers
    INCREASE missing by 1
  END WHILE

  RETURN missing

END FUNCTION
```

5.) Passing Cars

```
FUNCTION solution(A)

  SET east_cars = 0
  SET passing_cars = 0

  FOR each car in A

    IF car equals 0
      INCREASE east_cars by 1

    ELSE IF car equals 1
      ADD east_cars to passing_cars

    ELSE
      DISPLAY "This car is not going east or west"
    END IF
  END FOR

  IF passing_cars is greater than 1,000,000,000
    RETURN -1
  END IF

  RETURN passing_cars

END FUNCTION
```
